PROFESSIONAL SUMMARY

Full-Stack Software Engineer (MSc Computer Science, Merit, University of Southampton) with 2+ years building scalable enterprise platforms using React.js, TypeScript, Node.js and PHP. Delivered solutions supporting 200k+ daily users and 100k monthly users, contributing to 15% lower infrastructure costs and 20% lower email volume. Experienced across cloud migration, CI/CD, automated testing, event-driven systems and accessible UI development.

TECHNICAL SKILLS

Functional Competencies: Frontend Development | Full-Stack Development | REST API Integration | Agile/Scrum (24 sprints) | Code Review & Mentoring | Web Performance Optimisation | Accessibility (WCAG) | Debugging & Root-Cause Analysis | Technical Documentation | A/B Testing & Analytics

Technical Tools: React.js | Next.js | TypeScript | JavaScript (ES6+) | Redux | React Hooks | HTML5 | CSS3 | Tailwind CSS | AJAX | JSON | Node.js | Express | PHP | PostgreSQL | MySQL | MongoDB | Elasticsearch | Kibana | Kafka | RabbitMQ | Jest | Playwright | Git | GitHub Actions | CI/CD | AWS | GCP | Figma | SendGrid | Google Analytics | OpenAI API

WORK EXPERIENCE

Software Engineer

Jun 2021 – Aug 2023

IndiaMART InterMesh Ltd | India

- Developed **Seller Academy** using **React.js, Next.js, Node.js and MongoDB**, educating newly onboarded users on platform features and scaling to **100,000 monthly users**.
- Enhanced the core **Tender Listing Platform** with **React.js, Next.js, Node.js and PHP**, implementing filtering, sorting and location-based discovery, contributing to a **15% increase in transactions**.
- Re-engineered tender uploads using **Node.js and RabbitMQ**, introducing duplicate detection and parallel processing to broaden vendor onboarding and reduce CMS infrastructure costs by **15%**.
- Built automated tender notifications using **PHP, SendGrid, HTML/CSS and JavaScript**, embedding **Google Analytics tracking** in collaboration with Marketing to improve campaign and user engagement metrics.
- Supported **AWS/GCP migration and CI/CD** with GitHub Actions, monitoring production via **Elasticsearch/Kibana** and improving quality through **Jest, Playwright and code reviews**.

Associate Software Engineer

Mar 2021 – Jun 2021

IndiaMART InterMesh Ltd | India

- Developed web modules using **JavaScript, React, HTML, CSS and PHP** within an Agile software engineering team.
- Investigated application issues through debugging and root-cause analysis, contributing fixes and technical documentation to improve application reliability.

PROJECTS

MovieFlix (React, Redux, Tailwind CSS, OpenAI GPT API, TMDB API, Firebase)

[Github](#)

- Built an AI-enabled customer-facing streaming application using React/Redux, integrating OpenAI GPT and TMDB REST APIs through reusable components and client-side state management.
- Implemented routing, authentication and API-driven workflows, maintaining a modular frontend architecture for scalable feature development.

Cloud Surgery (React, Material UI, JSON Server — University Project)

[Github](#)

- Developed a role-based healthcare management application with reusable React components and API-driven workflows for patient and staff portals.

EDUCATION

University of Southampton, MSc Computer Science (Upper Second-Class Honours (2:1))

Sep 2023 – Dec 2024

Highlights: Advanced Computer Science | Software Engineering | Web & Application Development | AI & Data-Driven Technologies

Amity University, B.Tech Computer Science – CGPA: 7/10 | Noida, India

Sep 2017 – Aug 2021

Highlights: Computer Science Fundamentals | Software Development | Database Systems | Web Technologies | Programming & Algorithms
